

Model:  
CL60

Icemaker - Vertical Evaporator Production  
62kg production, 22kg storage

### General Information

CL60, the elegant compact mains connected icemaker produces 62kg of cubed ice per 24 hours with a generous 22kg insulated storage bin.

The exterior of the CL60 is constructed entirely from stainless steel, attractive, timeless and hygienic.

The small foot print of the CL60 allows for easy installation under counter or behind the bar.

The mains water and waste connections allow the machine to run 24 hours a day so that there is always ice available when required.

Intelligent electronic controls turn off production when the storage bin is full and automatically restart the machine when ice is removed.

A self cleaning cycle allows for easy maintenance for sanitary and hygienic operation and a built in air filter makes routine condenser cleaning easy.

### Key Features

- Vertical evaporator production
- Dice shaped ice cubes
- 62kg production per 24 hours
- 22kg insulated storage bin
- Intelligent electronic controls
- mains connected for fully automatic operation
- Self cleaning cycle
- Condenser air filter for easy maintenance
- Adjustable ice thickness

### Construction

- Stainless steel construction
- Insulated storage bin
- Small footprint design for easy installation

### Available Options

- Evepure 4H water filter

Technical Data	
Model	CL60
Production / 24 hours	62kg
Storage bin	22kg
Ice shape	Dice
Defrost type	Hot gas
Condenser type	Air
Evaporator	Vertical
External Dimensions	Width = 610 Depth = 656 Height = 910
Interior Finish	Food safe plastic
Exterior Finish	Stainless steel
Power supply	230v 50hz
Power rating	290w
Refrigerant	R290
Climate Class	SN, N, ST

Approvals	Available At	Document #
