

Model:
CL90

Icemaker - Vertical Evaporator Production
 102kg production, 32kg storage

General Information

CL90, the elegant compact mains connected icemaker produces 102kg of cubed ice per 24 hours with a generous 32kg insulated storage bin.

The exterior of the CL90 is constructed entirely from stainless steel, attractive, timeless and hygienic.

The small foot print of the CL90 allows for easy installation under counter or behind the bar.

The mains water and waste connections allow the machine to run 24 hours a day so that there is always ice available when required.

Intelligent electronic controls turn off production when the storage bin is full and automatically restart the machine when ice is removed.

A self cleaning cycle allows for easy maintenance for sanitary and hygienic operation and a built in air filter makes routine condenser cleaning easy.

Key Features

- Vertical evaporator production
- Dice shaped ice cubes
- 102kg production per 24 hours
- 32kg insulated storage bin
- Intelligent electronic controls
- mains connected for fully automatic operation
- Self cleaning cycle
- Condenser air filter for easy maintenance
- Adjustable ice thickness

Construction

- Stainless steel construction
- Insulated storage bin
- Small footprint design for easy installation

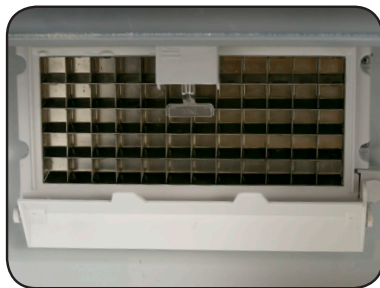

Available Options

- Evapure 4H water filter

Technical Data

| | |
|-----------------------|--|
| Model | CL90 |
| Production / 24 hours | 102kg |
| Storage bin | 32kg |
| Ice shape | Dice |
| Defrost type | Hot gas |
| Condenser type | Air |
| Evaporator | Vertical |
| External Dimensions | Width = 715 Depth = 656 Height = 910 |
| Interior Finish | Food safe plastic |
| Exterior Finish | Stainless steel |
| Power supply | 230v 50hz |
| Power rating | 290w |
| Refrigerant | R290 |
| Climate Class | SN, N, ST |
